The number of measles cases in the Auckland Region

1409

Confirmed measles cases in the region between 1 January – 9 October 2019

162

Cases of measles reported in the past two weeks

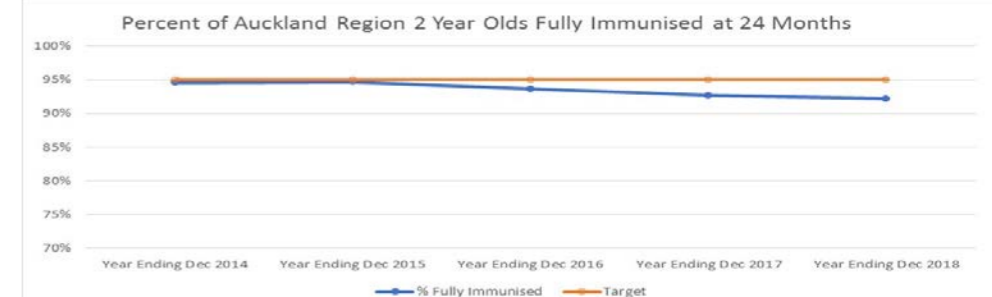

Outbreak Response

- **The priority remains to maintain the scheduled vaccinations at 12 months and 4 years.**
- Auckland region have been providing targeted community vaccinations since the end of August targeting Māori and Pacific 15-29 year olds.
- Consideration of new plan (plan B) for implementation in metro Auckland in response to the high hospitalisation rates in 0-4 years, further discussion on this to be held between DHB and Ministry of Health.

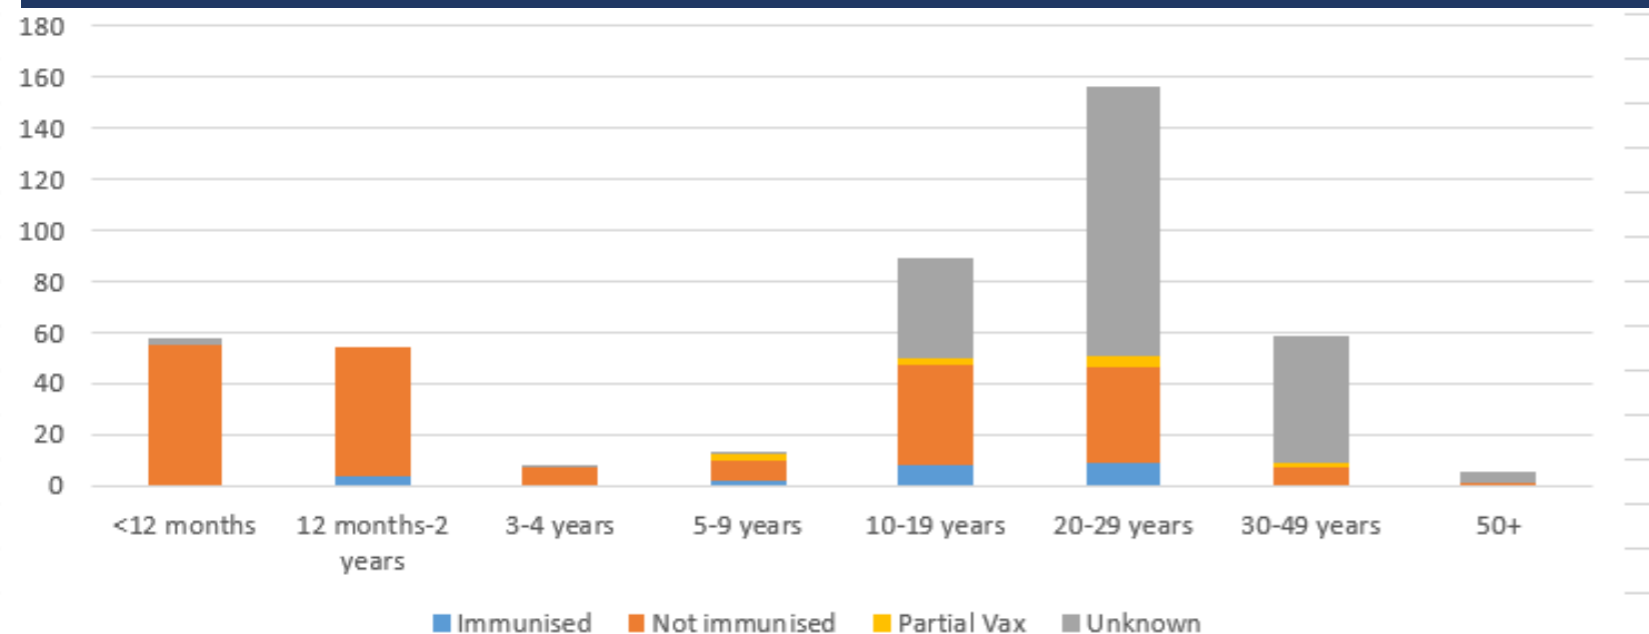

Factors to consider for Auckland Region

Disproportionate impacts in South Auckland and for Pacific and Māori children 0-4 years.

Immunisation Rate Trend at December: 2014 - 2018 Children Fully Immunised at 24 Months

Unknown	4	9	1	5	114	301	145	17

Vaccine Updates

- 68,285 vaccines administered to date in 2019.
- The region has 12,000 doses in stock as at 1 October 2019.
- The region have estimated they will need 67,000 doses to deliver to their priority groups and outbreak response. This includes MMR0, some 15-29 year olds and school-based activities.
- The Ministry has allocated 55,000 from 100,000 to Auckland region.
- Pleased with updated stock allocation and have made plans accordingly
