Executive Summary of Audit

General Overview

Moana House is part of the Waikato District Health Board. The service renders geriatric hospital and rest home services with a capacity for 20 hospital and 27 rest home residents. Occupancy on the day of the audit was 47 residents. There are two requirements for improvement relating to medicines management. The previous requirements for improvement are fully implemented.

Outcome 1.1: Consumer Rights

Service providers communicate effectively with residents and confirm that full and frank disclosure of information occurs. Family members are informed of incidents and accidents.

Residents have access to interpreter services should they need the service and are provided with a toll-free number should they need the advocacy service. Residents and family members confirm they understand and are comfortable with the complaints process. The organization displays on the reception wall the HDC information sheet regarding learning from complaints and includes the complaints protocol in the resident pack given to residents on entry to the facility. During the past 12 months there have been two complaints and one performance concern lodged with the service of which one was reported to the HDC. The service is maintaining an up-to-date complaints register that includes all complaints, dates, and actions taken.

The previous requirement for improvement relating to all advanced directives having to be signed by the appropriate people is now fully implemented.

Outcome 1.2: Organisational Management

The purpose, values, scope, direction and goals are documented in the trust board policies which include governance, service provision, human resources and the service environment, sighted the service's 2012 – 2013 business plan which includes continuous quality improvement strategies, financial systems, identification of opportunities that support the viability of the organisation, strategies to maximise opportunities and cost effective marketing programme and promotion and development of the organisation's assets to meet predicted needs of the community.

The service has a quality and risk management system is implemented and maintained, confirmed in documents, records and interviews of residents, family members and service providers.

The service has current policies and procedures which are aligned with current good practice and service delivery meeting the requirements of legislation to guide the facility in service delivery. Quality improvement data are collected and analysed monthly and use coloured charts showing trends. Actual and potential risks are identified, documented and where appropriate communicated to residents, their families and visitors. The service provider understands their statutory and regulatory obligations regarding essential notification and reporting when required and has a list of essential notifications and the reporting authorities.

Human resource management processes are conducted in accordance with good employment practice and meet the requirements of legislation. Professional qualifications are validated and include evidence of professional registration, scope of practice and competencies for service providers. Orientation and induction of new staff members include employee orientation to the organisation, basic and advanced clinical orientation. The service has an education and training programme covering appropriate training topics for keeping knowledge current. Residents receive timely, appropriate and safe services from suitably qualified, skilled and or experienced service providers.

The previous requirement for improvement relating to the service to have a defined internal audit programme with a written internal audit schedule for the various different disciplines within the service is now fully implemented.

During the past 12 months the general manager reported and records confirm there have been two complaints and one performance concern lodged with the service of which one was reported to the HDC. The service is maintaining an up-to-date complaints register that includes all complaints, dates, and actions taken.

The service received a complaint from a family regarding the care of their loved one in XXXXXX.

The complaint was about: 1. there was a lack of communication and family involvement, 2. standards of care and 3. Inadequate documentation.

The general manager then replied to the complainant, apologising for the problems, itemised the complaint into three areas for improvement and documented what the service intended to do to implement change. The general manager also provided contact information for an independent advocate to the complainant. There was no response from the complainant post sending the letter.

In XXXXX the general manager received a letter from the health and disability commissioner (HDC) regarding a complaint from this family and wanting more information relating to the complaint. The HDC wanted copies of the letter that went to the complainant and copies of the falls policy, the exception reporting and care plan documentation as well a copy of the intake / output chart. These documents were forwarded to the HDC.

The general manager is currently awaiting a response from the HDC and kept the WDHB portfolio manager informed.

ARC requirements are met.

Resident's receive timely, competent, and appropriate services in order to meet the assessed needs and desired outcome/goals.

Each stage of service provision is undertaken by suitably qualified and/or experienced service providers who are competent to perform the function. The clinical manager (CM) and the RNs have current Annual Practising Certificates as sighted. All RNs attend in-service trainings as sighted. Both the CM and RNs create long term care plans within three weeks after admission and evaluate long term care plans every six months as sighted.

Each stage of service provision is provided within time frames that safely meet the needs of the residents. On admission, the CM or admitting RN completes a client initial assessment as well as other risk assessment forms i.e. pain, continence, falls, Braden, Waterlow, Abbey, geriatric depression. The CM or RNs notify the GP when a new resident is admitted to the facility and ensure that the GP admits the new resident within 24-48 hour. The CM or RN's also notify the GP in the event that a resident manifests medical problems that require immediate attention or when requiring antibiotics. There are three general practitioners (GP) who are contracted by Moana House. One of the GP visits the primary care residents daily and the transitional care residents at least weekly. The palliative care residents are seen as required along with those with any acute care needs.

Long term care plans are created by either the CM or the RNs within two weeks and evaluate the long term care plans every six months, with exemption of the residents on InterRAI which is evaluated every 180 days. The activities coordinator ensures that an activity plan is in place within three weeks and reviews this plan every three months. Evaluations are sighted for both the long term care and activity plans.

The RNs use hand-over sheets. The contents of the hand-over are comprehensive. They use the progress notes to document the resident's current status including wounds, challenging behaviour, infections and activity involvement. The RN, physiotherapist, podiatrist, occupational therapist and other allied health team write in the progress notes which is integrated in the resident's file.

All RNs have current annual practising certificates as sighted. The clinical manager (CM) and registered nurses (RNs) create and evaluate the long term care plan for each resident every six months. InterRAI is in place since March 2013 and residents are gradually moved to InterRAI. Care plans are in place and sighted. InterRAI evaluations are reviewed every 180 days. All activity plans are created within a week from admission and the activities coordinator verbalises that the activity plans are reviewed every three months. The activities coordinator also spends time with new residents to gather information's e.g. what activities they would like to participate in.

16 of 16 medication charts reviewed have allergy status, discontinued dates/signed, legible and reviewed three monthly by the GP. Medications in the rest home are secure inside a medication trolley in the RN station while medications in the hospital are locked in a cupboard. There are two sets of keys for opening the treatment room and medication trolley. Medicines are only prescribed by the general practitioners (GP). All medicines are dispensed by the pharmacy in medico blister packs. The pharmacy is available for advice and support when needed. The pharmacy staff and the RN enter the delivered controlled drugs into the controlled drugs register. The controlled drugs registers are sighted and correct. Regular weekly stocktake is conducted by two RNs every Friday. The CM reports that discharged residents' medications are sent or dropped off at the pharmacy within 24 hours.

The RN also returns unused or expired medications to the pharmacy. The midday medication rounds are observed both in rest home and hospital. A list of competent staff for administering medication is verified with the current medication competencies for all staff. There are nine RNs, 16 caregivers and one enrolled nurse who are competent to administer medication. The controlled drugs safe is locked inside a locked roll-up cupboard. There are two controlled drugs registers, sighted - one for as regularly administered controlled drugs including PRN drugs and one for 'ward stock' controlled drugs. Medication reconciliation takes place on admission. Sharps bins are sighted and the CM reports that these sharps bins are collected when it is half full.

Five of 16 medication charts reviewed do not have photos for identification. Six of 16 medication charts are block signed by the GP. This is an area for improvement in 1.3.12.6. The temperature of the medication fridge containing insulin vials is monitored from January to July 2013, however, no further temperature monitoring is conducted from July 2013. There is a folder of controlled drugs outside the controlled drugs safe as noted during the medication room inspection. This is an area for improvement in 1.3.12.1.

There are nine RNs, 16 caregivers and one enrolled nurse who are competent to perform the function to administer medications. A list of competent staff to give medications is verified. The previous requirements for improvement relating to documentation not entered in the controlled drug register and not all staff responsible for medicine management being competent is now fully attained.

There is a policy and procedure in place to ensure that residents who wish to self-administer can do safely. One resident self-administers medications. Assessment tool for self-administration is completed and sighted. The CM reports that she provided the self-administering resident with a lockable plastic box and sighted in the resident's room. The staff ensure that the resident takes the prescribed medications by confirming with the resident if the medication is already taken. Medications are reviewed by the GP every three months as sighted.

The summer and winter menus are reviewed by the dietitian last September 2011. Policies in food service are implemented. The cook and kitchen assistants prepare meals wearing disposable hats and kitchen gloves. The CM or RNs informs the cook when a new resident is admitted. A list of special dietary requirements like diabetic, moulieed or food control are created and updated by the cook regularly as sighted on the kitchen board. Food allergies and dislikes are posted in the kitchen board to alert staff who are preparing the meals for the residents. The cook confirms that the facility provides modified meals like diabetic, moulieed and food control diets for residents. Dietary requirement is included in the client initial assessment during admission. Residents are weighed monthly as verified in the residents file. Seven out of seven residents reviewed have stable weights. Residents interviewed are happy with the meals provided by the facility.

All aspects of food procurement, production, storage, transportation, delivery, and disposal comply with current legislation, and guidelines. The cook dates the canned goods upon delivery. A first in-first out system is in place as verified during the interview with the cook. The support service manager is responsible in procuring stocks for the kitchen. The cook completes a pantry order sheet and gives this to the support services manager. The staff members are observed preparing meals for lunch and they are all wearing disposable hats and use clean technique in food preparation. Meals are covered when transported to the hospital unit. Opened foods are properly labelled and dated inside the chiller. Fridge, freezer and sanitiser temperature monitoring is sighted and conducted twice a day. The cook reports that there is enough equipment to prepare meals for the residents. All staff members working in the kitchen have current food handling certificates and verified.

Criterion 2.2.3.4 (HDS(RMSP)S.2008:2.2.3.4)

Each episode of restraint is documented in sufficient detail to provide an accurate account of the indication for use, intervention, duration, its outcome, and shall include but is not limited to:

- (a) Details of the reasons for initiating the restraint, including the desired outcome;
- (b) Details of alternative interventions (including de-escalation techniques where applicable) that were attempted or considered prior to the use of restraint;
- (c) Details of any advocacy/support offered, provided or facilitated;
- (d) The outcome of the restraint;
- (e) Any injury to any person as a result of the use of restraint;
- (f) Observations and monitoring of the consumer during the restraint;
- (g) Comments resulting from the evaluation of the restraint.

Standard 2.2.4: Evaluation (HDS(RMSP)S.2008:2.2.4)

Services evaluate all episodes of restraint.

ARC D5.4n ARHSS D5.4n, D16.6

Attainment and Risk: Not Audited

Evidence:

Criterion 2.2.4.1 (HDS(RMSP)S.2008:2.2.4.1)

Each episode of restraint is evaluated in collaboration with the consumer and shall consider:

- (a) Future options to avoid the use of restraint;
- (b) Whether the consumer's service delivery plan (or crisis plan) was followed;
- (c) Any review or modification required to the consumer's service delivery plan (or crisis plan);
- (d) Whether the desired outcome was achieved;
- (e) Whether the restraint was the least restrictive option to achieve the desired outcome;
- (f) The duration of the restraint episode and whether this was for the least amount of time required;
- (g) The impact the restraint had on the consumer;
- (h) Whether appropriate advocacy/support was provided or facilitated;
- (i) Whether the observations and monitoring were adequate and maintained the safety of the consumer;
- (j) Whether the service's policies and procedures were followed;
- (k) Any suggested changes or additions required to the restraint education for service providers.

Standard 2.2.5: Restraint Monitoring and Quality Review (HDS(RMSP)S.2008:2.2.5)

Services demonstrate the monitoring and quality review of their use of restraint.

ARC 5,4n ARHSS D5.4n, D16.6

Attainment and Risk: Not Audited
Evidence:

Criterion 2.2.5.1 (HDS(RMSP)S.2008:2.2.5.1)

Services conduct comprehensive reviews regularly, of all restraint practice in order to determine:

- (a) The extent of restraint use and any trends;
- (b) The organisation's progress in reducing restraint;
- (c) Adverse outcomes;
- (d) Service provider compliance with policies and procedures;
- (e) Whether the approved restraint is necessary, safe, of an appropriate duration, and appropriate in light of consumer and service provider feedback, and current accepted practice;
- (f) If individual plans of care/support identified alternative techniques to restraint and demonstrate restraint evaluation;
- (g) Whether changes to policy, procedures, or guidelines are required; and
- (h) Whether there are additional education or training needs or changes required to existing education.

NZS 8134.3:2008: Health and Disability Services (Infection Prevention and Control) Standards

Standard 3.1: Infection control management (HDS(IPC)S.2008:3.1)

There is a managed environment, which minimises the risk of infection to consumers, service providers, and visitors. This shall be appropriate to the size and scope of the service.

ARC D5.4e ARHSS D5.4e

Attainment and Risk: Not Audited
Evidence:

Criterion 3.1.1 (HDS(IPC)S.2008:3.1.1)

The responsibility for infection control is clearly defined and there are clear lines of accountability for infection control matters in the organisation leading to the governing body and/or senior management.

Attainment and Risk: Not Audited
Evidence:
Finding:
Corrective Action:
Timeframe (days): (e.g. for 1 week choose 7, for 1 month choose 30, for 6 months choose 180, etc.)

Criterion 3.1.3 (HDS(IPC)S.2008:3.1.3)

The organisation has a clearly defined and documented infection control programme that is reviewed at least annually.

Attainment and Risk: Not Audited
Evidence:
Finding:
Corrective Action:
Timeframe (days): (e.g. for 1 week choose 7, for 1 month choose 30, for 6 months choose 180, etc.)

Criterion 3.1.9 (HDS(IPC)S.2008:3.1.9)

Service providers and/or consumers and visitors suffering from, or exposed to and susceptible to, infectious diseases should be prevented from exposing others while infectious.

Attainment and Risk: Not Audited
Evidence:

Finding:
Corrective Action:
Timeframe (days): <i>(e.g. for 1 week choose 7, for 1 month choose 30, for 6 months choose 180, etc.)</i>

Standard 3.2: Implementing the infection control programme (HDS(IPC)S.2008:3.2)

There are adequate human, physical, and information resources to implement the infection control programme and meet the needs of the organisation.

ARC D5.4e ARHSS D5.4e

Attainment and Risk: Not Audited
Evidence:

Criterion 3.2.1 (HDS(IPC)S.2008:3.2.1)

The infection control team/personnel and/or committee shall comprise, or have access to, persons with the range of skills, expertise, and resources necessary to achieve the requirements of this Standard.

Attainment and Risk: Not Audited
Evidence:
Finding:
Corrective Action:
Timeframe (days): <i>(e.g. for 1 week choose 7, for 1 month choose 30, for 6 months choose 180, etc.)</i>

Standard 3.3: Policies and procedures (HDS(IPC)S.2008:3.3)

Documented policies and procedures for the prevention and control of infection reflect current accepted good practice and relevant legislative requirements and are readily available and are implemented in the organisation. These policies and procedures are practical, safe, and appropriate/suitable for the type of service provided.

ARC D5.4e, D19.2a ARHSS D5.4e, D19.2a

Attainment and Risk: Not Audited
Evidence:

Criterion 3.3.1 (HDS(IPC)S.2008:3.3.1)

There are written policies and procedures for the prevention and control of infection which comply with relevant legislation and current accepted good practice.

Attainment and Risk: Not Audited
Evidence:
Finding:
Corrective Action:
Timeframe (days): <i>(e.g. for 1 week choose 7, for 1 month choose 30, for 6 months choose 180, etc.)</i>

Standard 3.4: Education (HDS(IPC)S.2008:3.4)

The organisation provides relevant education on infection control to all service providers, support staff, and consumers.

ARC D5.4e ARHSS D5.4e

Attainment and Risk: Not Audited
Evidence:

Criterion 3.4.1 (HDS(IPC)S.2008:3.4.1)

Infection control education is provided by a suitably qualified person who maintains their knowledge of current practice.

Attainment and Risk: Not Audited
Evidence:
Finding:
Corrective Action:

Criterion 3.4.5 (HDS(IPC)S.2008:3.4.5)

Consumer education occurs in a manner that recognises and meets the communication method, style, and preference of the consumer. Where applicable a record of this education should be kept.

Attainment and Risk: Not Audited
Evidence:
Finding:
Corrective Action:
Timeframe (days): <i>(e.g. for 1 week choose 7, for 1 month choose 30, for 6 months choose 180, etc.)</i>

Standard 3.5: Surveillance (HDS(IPC)S.2008:3.5)

Surveillance for infection is carried out in accordance with agreed objectives, priorities, and methods that have been specified in the infection control programme.

Attainment and Risk: FA
Evidence: Moana House has an infection control committee chaired by the support services manager who has a background in microbiology. The infection control committee include one RN, one enrolled nurse, one maintenance person and three caregivers. Infection control meetings are conducted every three months. They are a member of Bug

Control and they can seek expert advice when needed. MedLab also provides annual education training for the staff. All infections are entered in the infection surveillance data sheet via the accident/incident & quality improvement form. The CM enters the infection surveillance data into their system and generates a monthly infection summary graph and is kept in the statistics folder. The type of surveillance is appropriate to the size and complexity of the facility.

Criterion 3.5.1 (HDS(IPC)S.2008:3.5.1)

The organisation, through its infection control committee/infection control expert, determines the type of surveillance required and the frequency with which it is undertaken. This shall be appropriate to the size and complexity of the organisation.

Attainment and Risk: FA
Evidence: .
