Introduction

This information is provided to make it easier for analysts to replicate our calculations. For each measure we have provided supporting information, a table and a flow diagram.

This document provides specifications for the following measure.

Measure	Measure abbreviation	Measure type
Proportion of people with colorectal cancer who died within 30 days of surgery	death30 death30es	Quality improvement
Proportion of people with colorectal cancer who died within 90 days of surgery	death90 death90es	Quality improvement

Sources of data for indicators

This document refers to the following national data sources.

- **Mortality Collection (MORT)** – classifies the underlying cause of death for all deaths registered in New Zealand
- **New Zealand Cancer Registry (NZCR)** – a population-based register of all primary malignant diseases diagnosed in New Zealand, excluding squamous and basal cell skin cancers
- **National Minimum Dataset (NMDS)** – a collection of public and private hospital discharge information, including coded clinical data for inpatients and day patients

More information on these data sources can be found on the Ministry of Health's website: www.health.govt.nz.
