### **Response to your request for official information**

Thank you for your request under the Official Information Act 1982 (the Act) to the Ministry of Health (the Ministry) on 25 May 2022. You requested:

*“Can you please tell me when the fluoridation of New Zealand’s water supplies take effect. Also wanting all information in regards to Whanganui region and fluoridation and what Minister is in charge?”*

As specified in the Health (Fluoridation of Drinking Water) Amendment Act 2021, the Director-General of Health (the Director-General) has the power to issue directions to local authorities to fluoridate their drinking water supplies. Further information about this is available at:

[www.legislation.govt.nz/act/public/2021/0044/latest/whole.html](http://www.legislation.govt.nz/act/public/2021/0044/latest/whole.html).

The Director-General has not yet made a decision whether to issue a direction to Whanganui District Council, or to any other local authority, to fluoridate any water supply. It is expected that by the end of 2022 the Director-General will make decisions about whether to issue directions to certain local authorities to fluoridate some drinking water supplies.

The Associate Minister of Health, Hon Dr Ayesha Verrall, is the Minister responsible for community water fluoridation.

Information within scope of your request is attached to this letter as Documents 1-4. The documents are itemised in Appendix 1. Where information is withheld under section 9 of the Act, please note I have considered the countervailing public interest in release in making this decision and consider that it does not outweigh the need to withhold at this time.

I trust this information fulfils your request. Under section 28(3) of the Act, you have the right to ask the Ombudsman to review any decisions made under this request. The Ombudsman may be contacted by email at: [info@ombudsman.parliament.nz](mailto:info@ombudsman.parliament.nz) or by calling 0800 802 602.

Please note that this response, with your personal details removed, may be published on the Ministry website at: [www.health.govt.nz/about-ministry/information-releases/responses-official-information-act-requests](http://www.health.govt.nz/about-ministry/information-releases/responses-official-information-act-requests).

**Appendix 1: List of documents for release**

#	Date	Document details	Decision on release
1	11 November 2021	Letter from Ministry of Health to local authorities	Released in full.
2	16 December 2021	Letter from Director-General of Health to Whanganui District Council	
3a	16 December 2021	Email correspondence: Follow up letter to Chief Executives – Action Required – Planning for community water fluoridation	
3b	15 December 2021	Attachment: Letter to local authority Chief Executives	
3c	15 December 2021	Attachment: Appendix One – Community Water Fluoridation	
4a	31 January - 8 March 2022	Email correspondence: Whanganui – fluoridation planning response	Some information withheld under section 9(2)(a) of the Act, to protect privacy of natural persons.
4b	N/A	Attachment: Copy of Community Water Fluoridation Questionnaire	Released in full.

11 November 2021

Tēnā koe

This letter is to update you on the Health (Fluoridation of Drinking Water) Amendment Bill (the Bill) and what it means for you.

As you may be aware, on Tuesday 9 November 2021, the Bill passed its final reading and will come into force 28 days after Royal assent. The new legislation amends the Health Act 1956 to give the Director-General of Health the power to issue a direction to local authority water suppliers (including bulk water suppliers) to fluoridate a public drinking water supply. The changes do not apply to private drinking water supplies.

### **Key content of the new legislation**

Under the new legislation, when deciding whether to issue a direction to fluoridate, the Director-General of Health will be required to consider for each individual drinking water supply:

- the scientific evidence on the effectiveness of adding fluoride to drinking water in reducing the prevalence and severity of dental decay
- whether the benefits of adding fluoride to the drinking water outweigh the financial costs, taking into account:
  - the state or likely state of the oral health of the local community or population group associated with the water supply
  - the number of people who are reasonably likely to receive drinking water from the local authority supply
  - the likely financial costs and savings of adding fluoride to the drinking water, including any additional costs of ongoing management and monitoring.

Before issuing any direction to fluoridate, the Director-General of Health must seek written comment from the local authorities on the estimated cost of introducing community water fluoridation, and the date by which the local authority could comply.

The new legislation exempts you from any requirement to consult with your communities on the decision to fluoridate.

Further information on these changes and the obligations for local authorities is in the attached fact sheet.

## Implementation

The Ministry of Health (the Ministry) intends to facilitate swift transition to the new fluoridation decision-making process, and anticipates that the Director-General of Health could commence issuing directions from mid-2022 onwards. Implementation will be phased over time and there will be some funding available to support local authorities with the costs of fluoridation-related capital works.

The Ministry is working through implementation details and expects to be able to provide further information to you in the next month.

The Ministry acknowledges the significance of the Government's Three Waters Reform programme on local authorities, including the recent announcement of the creation of the new water service entities. The Ministry of Health is working closely with the Department of Internal Affairs to ensure that implementation planning aligns with the reform programme and factors in current service delivery pressures across the water services sector.

## Resources for your communities

You may receive queries from your communities about community water fluoridation now that the new legislation has been passed. We encourage you to refer members of the public or interested groups to the resources below. They reflect the position of the Ministry of Health, World Health Organization, and Centres for Disease Control and Prevention that community water fluoridation is a safe, effective and affordable public health measure to improve the oral health of communities.

<https://www.fluoridefacts.govt.nz/>

<https://www.pmcsa.ac.nz/topics/fluoridation-an-update-on-evidence/>

We look forward to working with you to implement these new changes that will have an important health impact on the communities you serve. We will be in touch again shortly.

Ngā mihi

Subject: Whanganui - Action Required – Planning for community water fluoridation

Kia ora Hamish,

Following your recent phone call with Deborah Woodley, Deputy Director-General Population Health and Prevention, I have attached a letter to formally update you on community water fluoridation and the benefits it will have on your community. Please note, the Ministry of Health has asked for information from your local authority to assist with planning for fluoridation, which is due on **11 March 2022**.

Ngā mihi nui,

Ashley

Kia ora koutou,

Please see a further letter updating you on community water fluoridation and the next steps. A limited amount of capital works funding will be available to support local authorities with implementing fluoridation.

The letter seeks information from each local authority to assist with planning for fluoridation, which is due on **11 March 2022**.

Ngā mihi nui,

Oral Health team

T+64 4 496 2000

15 December 2021

Tēnā koe

Further to the Ministry of Health's letter of 11 November 2021, I am writing to update you on implementation planning for the Health (Fluoridation of Drinking Water) Amendment Act 2021 (the Act) and seek information from you to assist with this.

### **Next steps**

I expect to consider issuing directions to fluoridate from mid-2022 onwards and implementing these directions will take a staged approach. This will align with the significant reforms to the Three Waters infrastructure announced last month.

I encourage all local authorities with un-fluoridated community water supplies that service over 500 people to start fluoridation-related preparatory work now (a list of these supplies is attached as **Appendix one**), especially in areas with larger populations or that have poor oral health outcomes.

Please note local authorities do not need to wait for a potential direction from me to start fluoridating water supplies in their area. Community water fluoridation will substantially reduce rates of preventable tooth decay and it is widely recognised as one of the most important and proven public health measures to improve oral health

To support early adoption, the Ministry has a limited amount of capital works funding available for local authorities that are willing and able to begin the capital works to fluoridate by the end of 2022. The Ministry will provide more information about funding applications when it has received the information requested below. The Ministry will likely prioritise financial support for communities with poor oral health, or where there are disparities in oral health outcomes.

I recognise that there are some complex council-owned supplies across the country where it may not be feasible to fluoridate in a short timeframe. As part of the Three Waters reforms, new water services entities are due to be established in July 2024. These entities could be responsible for fluoridating these supplies (subject to any directions being issued). The Ministry and the Department of Internal Affairs will work together on how this will be managed as part of the asset management planning processes to establish the new entities. These processes will start next year.

## The Ministry requests some information from you now

The Ministry is now seeking information on the fluoridation 'readiness' of local authorities, and any cost and planning pressures they face. This will allow the Ministry to better understand how implementation of fluoridation will be phased<sup>1</sup>.

We ask that you provide the following information for each of your council-owned un-fluoridated drinking water supplies that service a population of 500 people or more:

- the status of your fluoridation infrastructure
- whether fluoridation capital works is underway or planned
- the expected date for completion of capital works (if relevant)
- the estimated capital works cost to fluoridate your supplies
- the budgeted capital works costs to fluoridate supplies included in long term plans or budgets
- the number of months required to fluoridate water supplies if a direction is issued
- other information useful for implementation planning.

Please also confirm the list of un-fluoridated supplies controlled by your local authority (see **Appendix one**) and provide the information above for any additional supplies that are not listed.

I request that you provide this information by completing and returning the attached spreadsheet by 11 March 2022 to [fluoride@health.govt.nz](mailto:fluoride@health.govt.nz). You can also use this contact email if you have any questions or would like to discuss matters further.

I look forward to working with you on this initiative to help improve the oral health of the communities you serve.

Nāku noa, nā

Dr Ashley Bloomfield  
**Te Tumu Whakarae mō te Hauora**

Hi

As per the DG's letter of 15 December requiring information un-fluoridated drinking water, we note that :-

"I request that you provide this information by completing and returning the attached spreadsheet...."

Unfortunately, no spreadsheet was attached to the copy we received.

Could you therefore send a copy to me directly ?

Many thanks

Mark

- Copy of Community Water Fluoridation questionnaire.xlsx

Please see Document 3b attached

**NOTE:**

- If a supply is already fully fluoridated, please enter "installed- in use" in Column C and no further information is required for that supply.
- If there are additional non-fluoridated supplies servicing a population of 500 or over that are not listed please add these supplies in a new row and enter the required information.
- In some cases the water supply referred to may already be partly fluoridated, and therefore the information requested relates only to the zones of that supply that are non-fluoridated.
- In other cases zones rather than the parent water supply may be listed.

Local Authority- Water Supplier	Water supply (servicing population of 500 people or more)	What is the status of fluoridation infrastructure? (select an option)	Are fluoridation capital works underway or planned? (Yes/No)	Expected date for completion of capital works, if relevant (enter date)- ie: respond if answer to Column D was yes	Estimated capital works cost to fluoridate supply if a direction is issued (dollars)	Budgeted capital works costs to fluoridate supply included in long term plans or budgets (dollars and allocation year/s)	Estimated number of months that would be required to fluoridate water supply if a direction is issued	Name and contact details of key contact for Community Water Fluoridation	Any other comments

The design of the flouridation plant must ensure monitoring and control of the flouridation process. Rural sites have no communications installed costs will be high. Under the new water regulator Taumata Arowai a new site will be included if flouridation becomes mandated as it now falls under a population base of > than 500.

RELEASED UNDER THE OFFICIAL INFORMATION ACT 1982
