- 2. Has the mRNA Spike protein antibody been researched and tested in New Zealand independently to see if it will be inserted into human cells via a Trojan Horse Mechanism and make it replicate over and over without being able to turn it off?*
- 3. Has the mRNA spike protein antibody been researched and tested in New Zealand to see if it will "shut" off M2 anti-inflammatory macrophages and prevent the natural removal of toxic debris and the SARS CoV 2 Virus, other viruses and bacteria?*
- 4. What independent studies has the New Zealand Government done regarding the activation process of antibody dependent enhancement and accelerated autoimmune diseases when re-exposed to SARS CoV 2 and other Corona Viruses after a person has been vaccinated by COVID 19 Vaccines?"*
