

2012 Workforce Immunisation coverage rates by district health board (DHB)

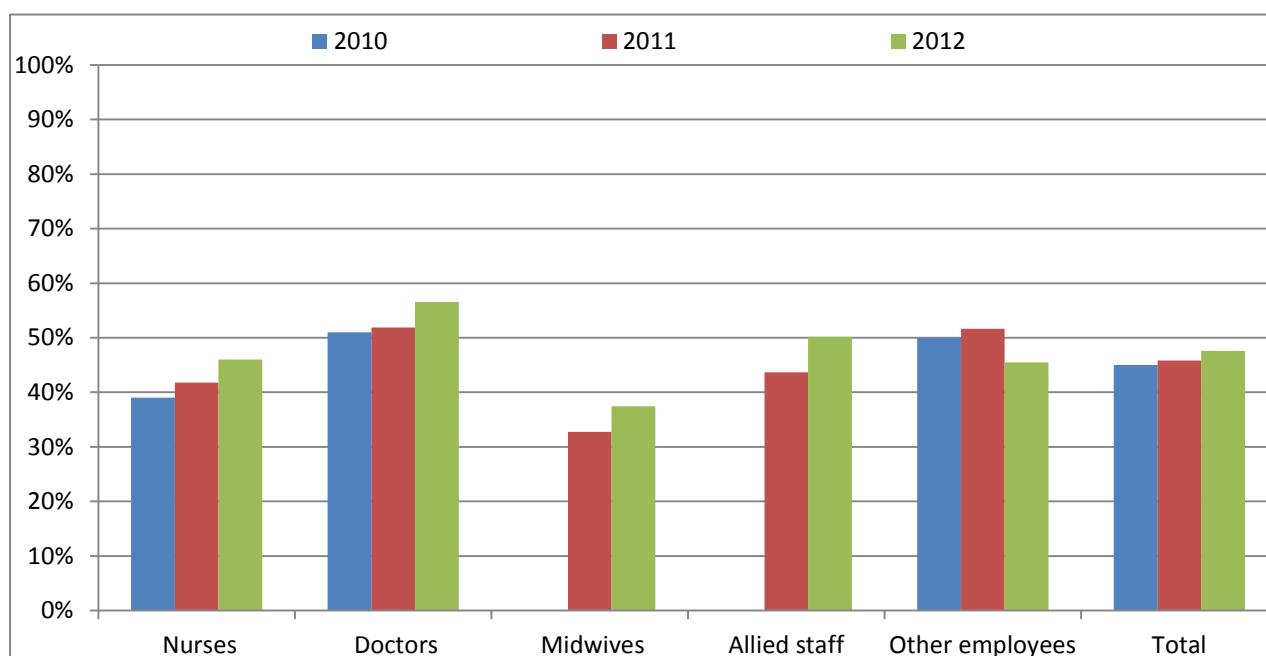

All DHBs offer free influenza immunisation to their staff. Since 2010, the Ministry of Health has requested that all DHBs provide influenza immunisation coverage data for their staff at the end of each influenza season

Because DHBs offer free vaccination to different occupation groups across the country, it is difficult to compare immunisation rates across all occupations. However, we are able to compare coverage rates for the following occupations:

Nurses	Includes registered and enrolled nurses
Doctors	Includes registered doctors
Midwives	Includes registered midwives
Allied staff	Defined by DHB Allied Health Collective contract and includes but not exclusive to physiotherapist, occupational therapists, dieticians, social workers, pharmacists, speech language therapist.
Other employees	May include, but not limited to healthcare assistants, cleaners orderlies, administrators, management etc.

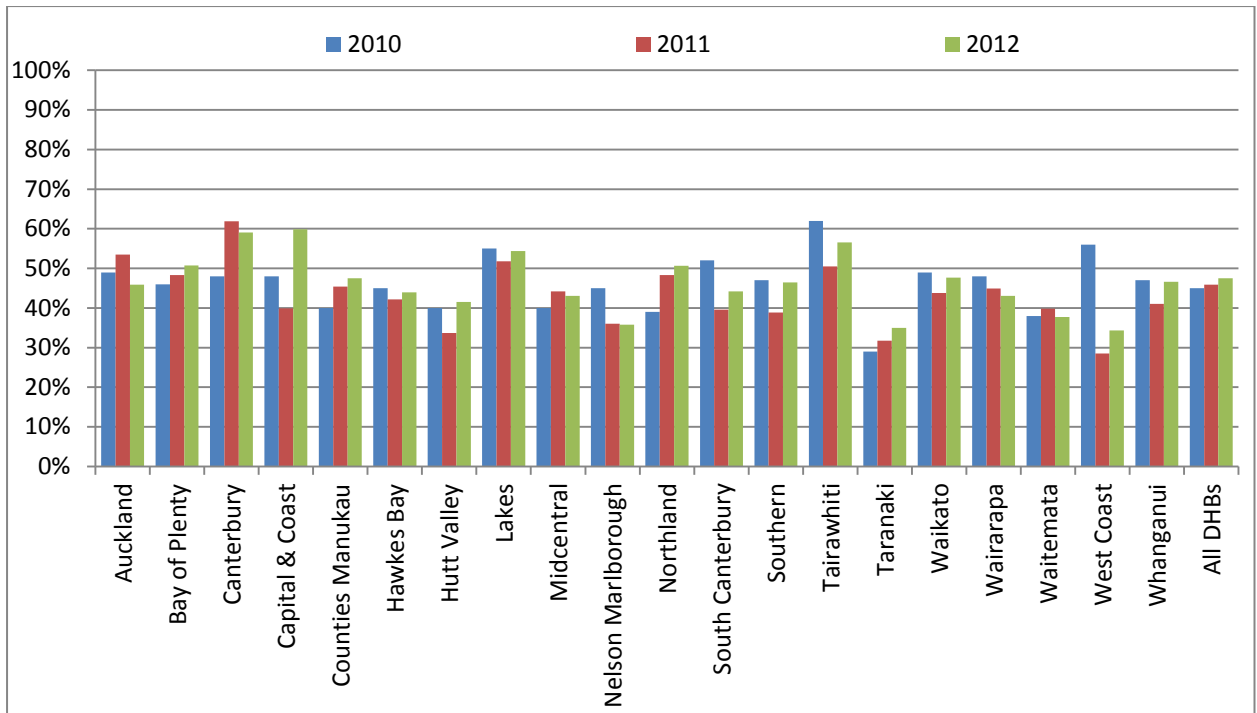

Comparisons of overall coverage rates and rates by occupation between 2010 and 2012 are presented below. Note that during 2010 not all DHBs were able to provide coverage information by occupation.

1. Influenza coverage for Health Care Workers by occupation (2010 – 2012)

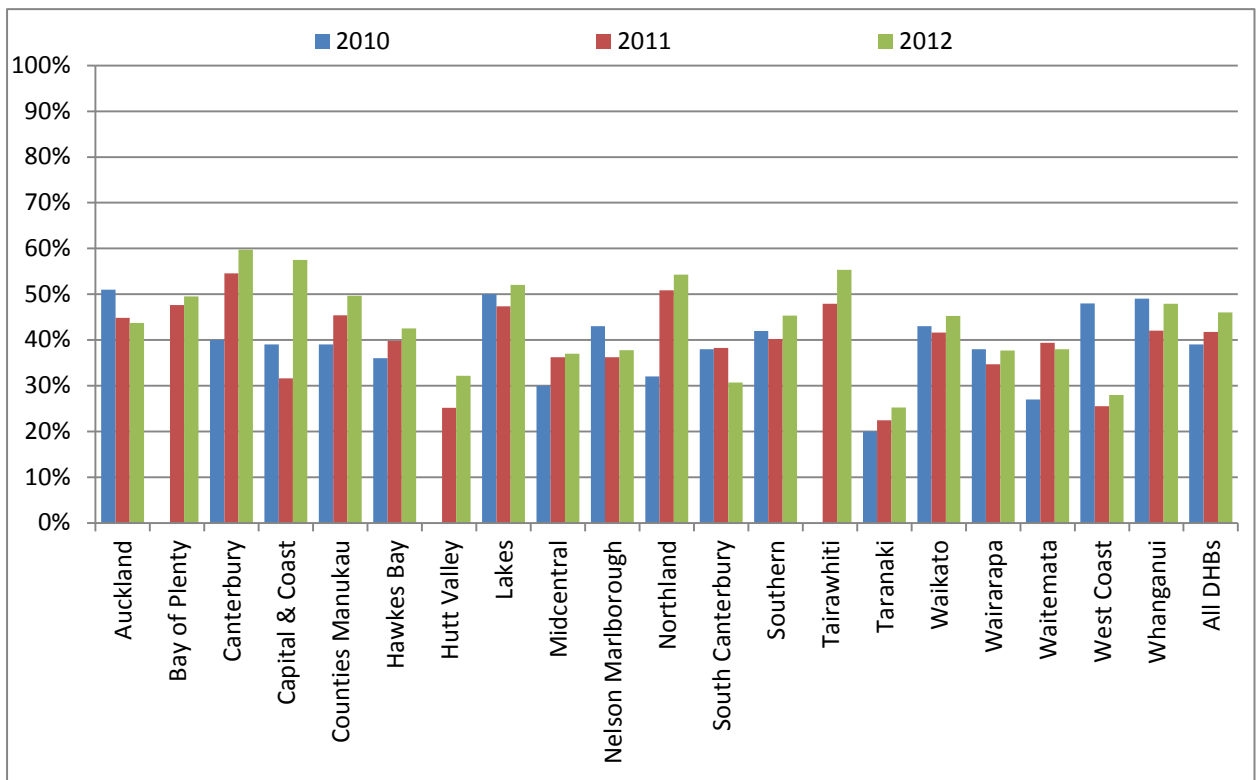

* During 2010 data for Midwives and Allied staff were not requested

2. Influenza coverage rate for Health Care Workers by DHB (2010 – 2012)

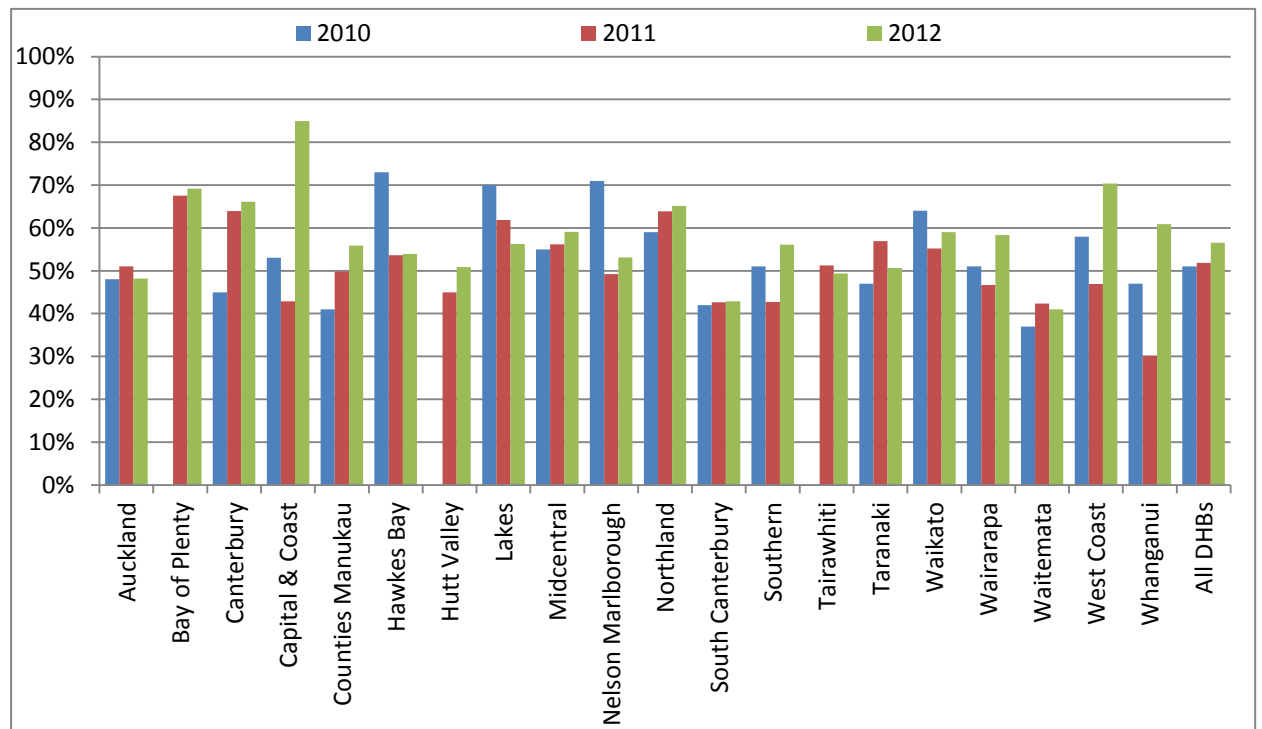

3. Influenza coverage for Nurses by DHB (2010 – 2012)

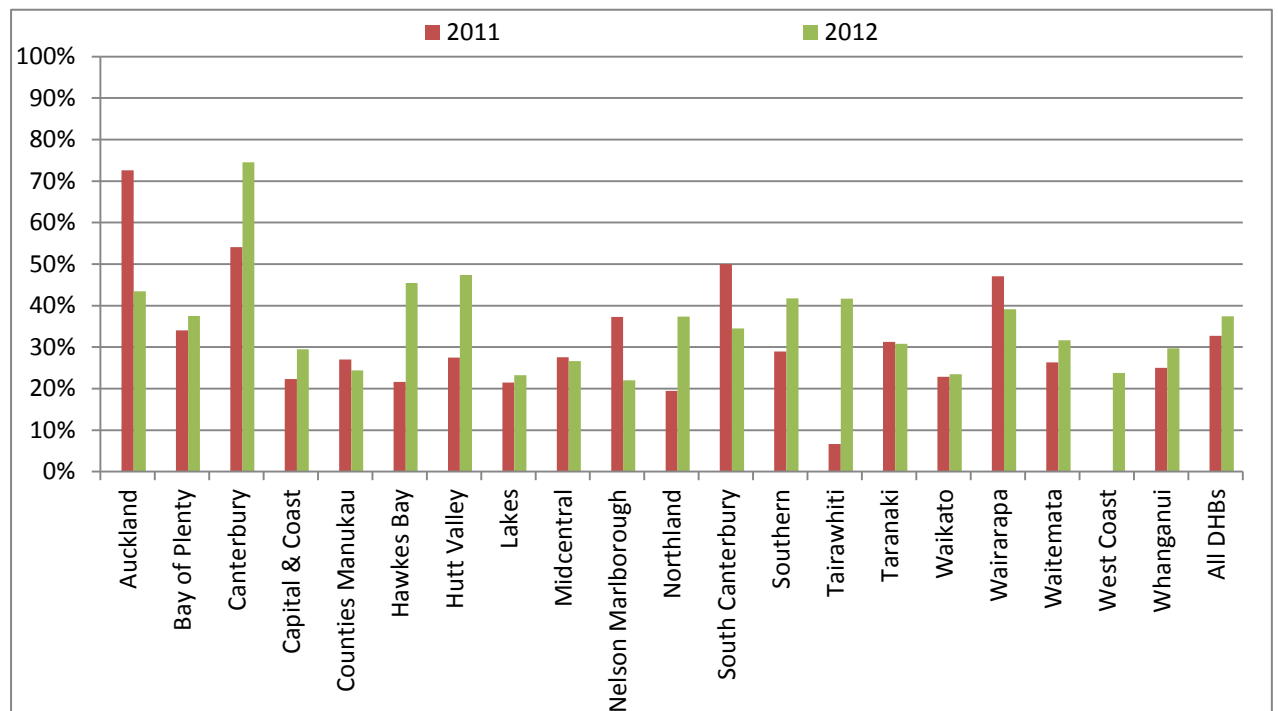

*During 2010 not all DHBs provided coverage information for nurses

4. Influenza coverage for Doctors by DHB (2010 – 2012)

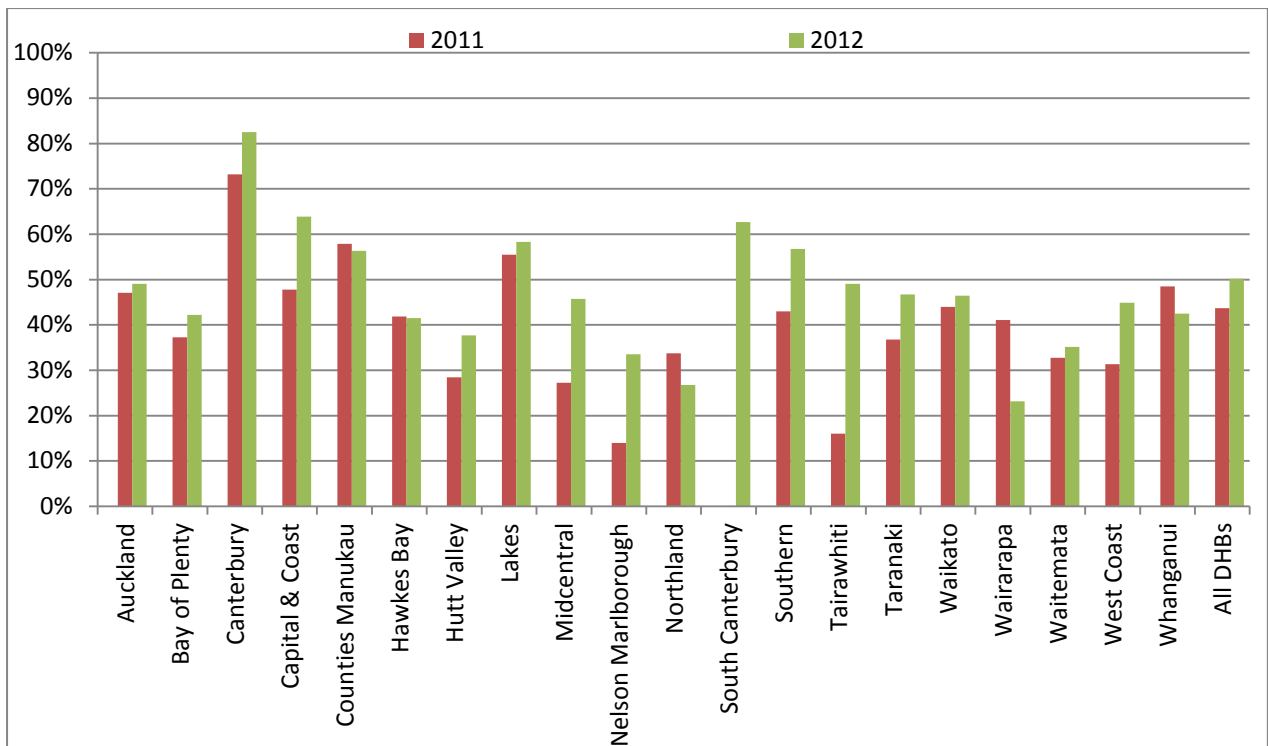

* During 2010 not all DHBs provided coverage information for Doctors

5. Influenza coverage for Midwives by DHB (2010 – 2012)
