

Executive Summary 12
NATIONAL MEASLES OUTBREAK 2019
Issued: 1030 hrs, 17 SEPTEMBER 2019

IN CONFIDENCE

New information in red text

All information is current as of **0830hrs 17 September 2019**

Situation

1. From 1 January 2019 to **17 September** 2019 there have been **1327** confirmed cases of measles notified across New Zealand (as at **0830hrs 17 September**) based on ESR reporting. This is an increase of **50** cases nationally since the **Executive Summary 11** provided on **Monday 16 September**.
2. Over the last two weeks (**4 September to 17 September**) there have been **279** new cases in the Auckland region. Within the Auckland region, most cases have been reported in Counties Manukau District Health Board (CMDHB) (*Appendix 1*), with **193** new cases reported in the last two weeks. Nationally, **324** cases have been reported over the same period including the Auckland cases.
3. Given the large number of cases in the Auckland region, it is expected that further isolated cases will continue to be reported in areas outside of the Auckland region.
4. Recent cases outside of the Auckland region have been linked to the Auckland outbreak, and are limited to single cases and small clusters, such as the Queenstown outbreak. Public Health Units (outside of the Auckland region) continue to manage these cases and their contacts promptly, in order to limit transmission.
5. The Ministry of Health is managing vaccine stock distribution. On **Monday 16 September** **52,000** doses of the MMR vaccine arrived in New Zealand.

Next Report

The next report will be an **Executive Summary** at **1100 hrs** on **Wednesday 18 September 2019**.

Prepared by: Dean Manson, Intelligence

Approved by: Kath Blair, National Coordinator

Appendix 1. Cases per DHB in New Zealand

DHB	Cumulative Cases - 1 January 2019 to 17 September 2019	Cases in the last 14 days (4 September to 17 September)	Cases since last report	Status*
Northland	45	10	4	Auckland link
Waitemata	182	42	5	Outbreak ongoing
Auckland	156	44	5	Outbreak ongoing
