

Appendix 4: Secondary outcome data (Excluding data arising from participants once entered residential home)

The following 45 plots illustrate graphically changes in secondary outcome data over time.

The variables measured are:

1. ADL Short Form scale
2. ADL Self-performance scale
3. ADL Long Form scale
4. IADL Difficulty Scale
5. IADL Involvement Scale
6. IADL Summary Scale
7. Cognitive Performance Scale (CPS)
8. Depression Rating Scale (DRS)
9. CHESS Scale
10. Pain Scale
11. Short Form – 36 (Physical)
12. Short Form – 36 (Mental)
13. Caregiver Reaction Assessment (CRA)
14. EuroQoL Visual Analogue Scale
15. EuroQoL Visual Analogue Scale (completed by caregiver for older person)

NOTE: These plots exclude data collected after an older person has been admitted to residential care.

Appendix 5: Secondary outcome data (Including data arising from participants once entered residential home)

The following 45 plots illustrate graphically changes in secondary outcome data over time.

The variables measured are:

16. ADL Short Form scale
17. ADL Self-performance scale
18. ADL Long Form scale
19. IADL Difficulty Scale
20. IADL Involvement Scale
21. IADL Summary Scale
22. Cognitive Performance Scale (CPS)
23. Depression Rating Scale (DRS)
24. CHESS Scale
25. Pain Scale
26. Short Form – 36 (Physical)
27. Short Form – 36 (Mental)
28. Caregiver Reaction Assessment (CRA)
29. EuroQoL Visual Analogue Scale
30. EuroQoL Visual Analogue Scale (completed by caregiver for older person)

NOTE: These plots include data arising from all scales from all assessment points
