**Shorter stays in Emergency Departments**

The target is that 95 percent of patients will be admitted, discharged or transferred through public hospitals, and home again.

**Improved access to Elective Surgery**

The target is an increase in the volume of elective surgery by an average of 4200 discharges per year.

*Otago DHB's delivery is under-reported due to a change in Patient Management System leading to problems submitting data to national collections.*

**Shorter waits for Cancer Treatment Radiotherapy**

The target is that 95 percent of patients will be admitted, discharged or transferred from an Emergency Department within four weeks by December 2010. Six regional oncology centres provide radiation oncology services. These centres are in Auckland, Hamilton, Palmerston North, Wellington, Christchurch and Dunedin.

**Increased Immunisation**

The target is that 85 percent of two-year-olds* will be fully immunised by July 2010; and 95 percent by July 2012.

*This result includes children who turned two years old in quarter one and who were fully immunised before they turned two years old.*

**Better help for Smokers to Quit**

The target is that 80 percent of hospitalised smokers will be provided with advice and help to quit by July 2010; 90 percent by July 2011; and 95 percent by July 2012. The graph represents only data coded in September. Improved data capture is expected next quarter.

**Better diabetes and cardiovascular services**

This graph represents the average progress made by a DHB towards three target indicators: (a) an increased percent of the eligible adult population with diabetes who have had their cardiovascular disease risk assessed in the last five years; (b) an increased percent of people with diabetes who will attend free annual checks; (c) an increased percent of people with diabetes who will have satisfactory or better diabetes management.
