### How is your DHB performing?

#### 2009/10 Quarter Three Results

[www.moh.govt.nz/healthtargets](http://www.moh.govt.nz/healthtargets)

---

**Shorter stays in Emergency Departments**
- The target is 95 percent of patients will be admitted, discharged, or transferred home again. To achieve this target with interventions.

**Improved access to Elective Surgery**
- The target is an increase in the volume of elective surgery by an average of 4,000 discharges per year.

**Shorter waits for Cancer Treatment Radiotherapy**
- The target is everyone needing radiation treatment will have this within six weeks. The data represents progress towards meeting the national target of everyone needing radiation treatment having treatment within six weeks by December 2009.

**Increased immunisation**
- The national immunisation target is for 85 percent of hospitalised smokers will be provided with advice and help to quit by July 2010; 90 percent by July 2011; and 95 percent by July 2012.  *This quarterly report includes children who turned two years between January and March 2010 and who were fully immunised at that stage.*

**Better help for smokers to quit**
- The target is that 80 percent of hospitalised smokers will be provided with advice and help to quit by July 2010; 90 percent by July 2011; and 95 percent by July 2012. The data represents progress towards meeting the national target of 80 percent of hospitalised smokers who have had their cardiovascular disease risk assessed in the last five years; an increased percent of people with diabetes will have satisfactory or better diabetes management.

---

**Better and Cardiovascular Services**
- This graph represents the average progress made by a DHB towards three target indicators: (a) an increased percent of the eligible adult population who have had their cardiovascular disease risk assessed in the last five years; (b) an increased percent of people with diabetes will have satisfactory or better diabetes management.
