## Raising healthy kids

The target is that by December 2017, 95 percent of obese children identified in the Before School Check programme will be offered a referral to a health professional for clinical assessment and family based nutrition, activity and lifestyle interventions. Data is based on all acknowledged referrals for obese children up to the end of the quarter from Before School Checks occurring in the six months between 1 March and 31 August 2016.

\*As this is the first time these results are being reported there is no comparison with the previous quarter.

Health target results are sourced from individual DHB reports, national collections systems and information provided by primary care organisations.
