

# How is My DHB performing?

2016/17 QUARTER TWO (OCTOBER–DECEMBER 2016) RESULTS

[www.health.govt.nz/healthtargets](http://www.health.govt.nz/healthtargets)

Shorter stays in  
**Emergency Departments**

Improved access to  
**Elective Surgery**

Faster  
**Cancer Treatment**

Increased  
**Immunisation**

Better help for  
**Smokers to Quit**

Raising  
**Healthy Kids**

## Shorter stays in Emergency Departments

The target is 95 percent of patients will be admitted, discharged, or transferred from an Emergency Department (ED) within six hours. The target is a measure of the efficiency of flow of acute (urgent) patients through public hospitals, and home again.

## Improved access to elective surgery

The target is an increase in the volume of elective surgery by an average of 4,000 discharges per year. DHBs planned to deliver 97,092 discharges for the year to date, and have delivered 3,300 more.

## Faster cancer treatment

The target is 85 percent of patients receive their first cancer treatment (or other management) within 62 days of being referred with a high suspicion of cancer and a need to be seen within two weeks. Results cover those patients who received their first cancer treatment between 1 July and 31 December 2016.

## Increased immunisation

The national immunisation target is 95 percent of eight-month-olds have their primary course of immunisation at six weeks, three months and five months on time. This quarterly progress result includes children who turned eight-months between October and December 2016 and who were fully immunised at that stage.

## Better help for smokers to quit

The target is 90 percent of PHO enrolled patients who smoke have been offered help to quit smoking by a health care practitioner in the last 15 months.

## Raising healthy kids

The target is that by December 2017, 95 percent of obese children identified in the Before School Check programme will be offered a referral to a health professional for clinical assessment and family based nutrition, activity and lifestyle interventions. Data is based on all acknowledged referrals for obese children up to the end of the quarter from Before School Checks occurring in the six months between 1 June to 30 November 2016.

\* This result is based on low volumes, six children identified as obese were not referred.

Health target results are sourced from individual DHB reports, national collections systems and information provided by primary care organisations.

This information should be read in conjunction with the details on the website [www.health.govt.nz/healthtargets](http://www.health.govt.nz/healthtargets)
