

How is My DHB performing?

2012/13 QUARTER TWO (OCTOBER–DECEMBER) RESULTS

www.health.govt.nz/healthtargets

Shorter stays in
Emergency Departments

Improved access to
Elective Surgery

Shorter waits for
Cancer Treatment

Increased
Immunisation

Better help for
Smokers to Quit

More
Heart and Diabetes Checks

Shorter stays in Emergency Departments

The target is 95 percent of patients will be admitted, discharged, or transferred from an Emergency Department (ED) within six hours. The target is a measure of the efficiency of flow of acute (urgent) patients through public hospitals, and home again.

Improved access to elective surgery

The target is an increase in the volume of elective surgery by at least 4000 discharges per year. DHBs planned to deliver 74,799 discharges for the year to date, and have delivered 3932 more.

Shorter waits for cancer treatment

The target is all patients, ready-for-treatment, wait less than four weeks for radiotherapy or chemotherapy. Six regional cancer centre DHBs provide radiation oncology services. These centres are in Auckland, Hamilton, Palmerston North, Wellington, Christchurch and Dunedin. Medical oncology services are provided by the majority of DHBs.

Increased immunisation

The national immunisation target is 85 percent of eight-month olds have their primary course of immunisation at six weeks, three months and five months on time by July 2013, 90 percent by July 2014 and 95 percent by December 2014. This quarterly progress result includes children who turned eight-months between October and December 2012 and who were fully immunised at that stage.

Better help for smokers to quit

The target is 95 percent of patients who smoke and are seen by a health practitioner in public hospitals, and 90 percent of patients who smoke and are seen by a health practitioner in primary care, are offered brief advice and support to quit smoking.

More heart and diabetes checks

This target is 90 percent of the eligible population will have had their cardiovascular risk assessed in the last five years to be achieved in stages by July 2014. The current stage is to achieve 75 percent by July 2013.

This information should be read in conjunction with the details on the website www.health.govt.nz/healthtargets
