Subject: I oppose plain packaging

Thank you for the opportunity to share my opinion about the Government's plain packaging proposal.

As an adult smoker, many of my choices are already restricted.

The Government has already increased tobacco taxes and removed cigarettes from shop display. And now, it's considering plain packaging? The Government already covers cigarette packs in graphic health warnings. Plain packaging won't make people stop smoking or stop them taking it up.

I'm tired of the Government regulating my choices.

Please consider my views before you target smokers like me with an unproven Australian policy.

Yours sincerely,
