36	Manaia Health PHO Limited	89%	▼
All PHOs		94%	–

**Increased immunisation**  
The national immunisation target is 95 percent of eight-month-olds will have their primary course of immunisation (six weeks, three months and five months immunisation events) on time. This quarterly progress includes children who turned eight months between January and March 2015, are enrolled in a PHO and who were fully immunised at that stage. Consequently, the All PHOs percentage above will be different to the All DHBs percentage.

### Better Help for Smokers to Quit Using Technical Advisory Services (TAS) Data

Ranking	PHO Name	Quarter three performance	Change from previous quarter

36	WellSouth Primary Health Network	64%	▲
All PHOs		89%	–

**Better help for smokers to quit**  
The national target is that 90 percent of patients who smoke and are seen by a health practitioner in primary care are offered brief advice and support to quit smoking. The performance for some PHOs is above 100 percent as in addition to offering advice in primary care settings, they contacted patients who had not recently attended their general practice to offer them brief advice and support to quit smoking.

\* Central PHO: Data has been made available since results were first published on 26 May 2015.

### More Heart and Diabetes Checks Using Technical Advisory Services (TAS) Data
