

The Three Step Model

Ask what whānau/family currently do to make their house warmer/drier and to prevent spread of infections between sleeping children.

Acknowledge what whānau/family are currently doing.

Build new information on to what whānau/family already know.
Identify something else whānau/family want to do, who is going to do it and when.
Identify what you are going to do (if relevant).

Check that the whānau/family are clear what they are going to do and what you are going to do (if relevant).
