

## Three Step Video Handout

### Step 1: Ask

Ask:

*“In your whānau/family what are you already doing to make your home warmer and drier?”*

Write these down and acknowledge what they are doing.

Show them the video.

### Step 2: Build

After watching the video ask the whānau/family:

*“Now you have seen the video what extra things do you realise you are already doing?”*

Add this to what you have already written down (Step 1).

*“Did you learn anything new from the video?”*

Write this down too.

*“Most people have questions about these sorts of videos – what are your questions?”*

*“What is something else you could do to make your house warmer or drier or to stop the spread of infections between sleeping children?”*

Record this on the reminder message (circle the relevant picture).

*“Who do you think could do that? Do you want me to write that down next to the picture?”*

Write down in the blank space anything you said you would do (e.g. referral to healthy homes provider) and put in the date.

*“Do you want to tick any pictures on the reminder message of the things you are already doing?”*

### Step 3: Check

*“So can you tell me what you decided you are going to do to make the house warmer/drier/ to stop infections?”*

If relevant *“And what did I say I would do and by when?”*

If necessary, refer to the reminder message.

Thank them and write down your name and contact number if they need to contact you again.
