

How to get your NZ COVID Tracer poster

PUBLIC TRANSPORT OPERATORS

For large number of vehicles you can create a bulk amount of office QR codes.

1. Download and complete the Excel spreadsheet here:

<https://www.health.govt.nz/system/files/documents/pages/nz-covid-tracer-bulk-upload-template-12aug20.xlsx>

2. Email it to the Ministry of Health's NZ COVID Tracer support team at help@covidtracer.min.health.nz
3. Once we have received and reviewed your template, we will phone you as soon as we can to complete an identity check. This step can be completed more quickly if you have your driver licence handy, although we also have other verification options.
4. Once your identity is confirmed, we will generate your official QR code poster(s) and send them to the email addresses provided in the template as soon as possible.

TAXIS, SHUTTLES & RIDESHARES

Go to <https://qrform.tracing.covid19.govt.nz/> to generate an official QR poster for your vehicle. You will be asked for your drivers license to verify who you are, this is only used as a verification process and not used for anything else.

Remember, a separate poster is required for each vehicle.

WHERE TO DISPLAY IN:

TAXIS, SHUTTLES & RIDESHARES

Place it on a clipboard for people to scan.

Fix the poster to the back of the passenger seat.

BUSES, FERRIES & TRAINS

Have QR Code poster display at each entrance and exit and multiple places inside the vehicle/vessel/carriage too

If you don't have a printer at home, try your local library

Remember to ask everyone in the vehicle to scan it, not just one person.
