**PRIMHD Code Set Standard
HISO 10023.3:2017**

Keeping Standards up-to-date

HISO Standards are living documents that reflect changes and progress in Health Information science, technology and systems. All Standards are periodically reviewed to assess and maintain their currency and new editions are published. Amendments may be issued between published editions.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which will incorporate any amendments that may have been issued since the Standard was published.

Detailed information about HISO Standards, drafts, amendments and new projects can be found by visiting the HISO website as below.

HISO welcomes suggestions for improvements, and encourages readers to immediately advise any apparent inaccuracies or ambiguities, using either email at standards@moh.govt.nz, or write to:

Version Control

Note: version control added to document at version 2.2

Reason for Change	Version	Date
Original published document	Version 2.1	June 2010
Updated to replace code 'valid to' dates of 30-06-2011 with 30-06-2015.	Version 2.2	October 2010
General update applied following HISO review of PRIMHD. Changes made are significant and pervasive. They reflect a generic refresh of dates, legislative references, the incorporation of changes to the PRIMHD process and the inclusion of additional record indicator code groupings.	Version 3.0	June 2013
Section 2.10 implementation dates amended	Version 3.0	December 2013
The Standard has been updated as follows:: <ul style="list-style-type: none"> Minor administrative changes have been made to Activity Record Codes T40, T47 and T49 (section 2.4.1.1) and to Mode of Administration codes MA02 and MA28 (section 2.7.1.2) Clarification and expansion has been added to ADOM Outcome Item Codes - Question 7 (Section 2.8.1.1) The Standard now indicates that the implementation of Section 2.10 (Supplementary Record Code) is on hold. An implementation date will be advised in due course and is likely to be July 2015. 	Version 3.1	July 2014
The Standard has been updated as follows:: <ul style="list-style-type: none"> Wording changes have been made to Activity Record Codes T47 and T49; Code T50 has been added (section 2.4.1.1) Supplementary Record Code information collection is activated from 1 July 2016 (section 2.10) with minor textual amendments made. 'Education and Training Status' (section 2.10.4) has been added replacing 'PHO Registration' (now a derived field). 	2015	July 2015
Definition at section 2.10.2.5 clarified. Minor errata corrected. The Creative Commons license is updated to version 4.0.	2015	January 2016
Changes made to this version of the PRIMHD Standard suite derive from the Substance Addiction (Compulsory Assessment & Treatment) Act 2017. Minor administrative updates are included.	2017	August 2017
Addition of ICD 10-AM eleventh edition as a Clinical Code System Identifier (section 2.5.1.1) and Clinical Code Value (section 2.5.1.3)	2017	April 2019

1 INTRODUCTION

1.1 Documents

The PRIMHD Standard comprises the following three documents:

- 10023.1:2017 PRIMHD Data Process Standard
- 10023.3:2017 PRIMHD Data Set Standard
- 10023.3:2017 PRIMHD Code Set Standard

These documents should be read together. Their separation is solely to simplify the structure of the Standard for ease of use. The Standards are designed to promote interoperability of information systems within the health and disability sector.

1.2 Overview of the code set standard for PRIMHD

This document defines the common set of codes to be used for each data element of the Integrated Mental Health Collection (PRIMHD) data set that requires coding.

The adoption of a common code set for the health sector will reduce the need for complex interface programmes to translate or manipulate data being exchanged. It will also contribute towards creating a common understanding of data, thus allowing better analysis and interpretation.

Most codes fall into one of two categories:

1.2.1 Demographic codes

These are codes or values that are used throughout the health sector, such as codes for 'Title' (Mr, Mrs, etc or organisation name, etc). These need to be used consistently.

1.2.2 Speciality specific codes

These are specific to mental health and addiction services eg HoNOS.

Within this document the code sets are presented as follows:

- code: the value that is used for data storage and data entry.
- description of the code: a textual description of the code that would be displayed on reports and for viewing on-screen.
- 'Valid From' and 'Valid To': fields that indicate the time period a code is valid for. This information enables old codes to be retired and new codes to be created, whilst retaining the ability to validate incoming data.
- Used for/Comment: a textual explanation of the code. This is for information only and can be used for training and user documentation. A definition may not be included where the description is obvious.

1.3 The purpose of the PRIMHD

PRIMHD (pronounced 'primed') is a Ministry of Health single national mental health and addiction information collection of service activity and outcomes data for health tangata whaiora/consumers.

The vision for PRIMHD is to assist in the improvement of health outcomes for all mental health and addiction tangata whaiora/consumers in New Zealand by the provision of a single rich data source of national mental health & addiction information that can be used for multiple purposes.

The purpose of PRIMHD is to provide:

Secure Information Access and **Reporting** to underpin **Decision Support** and **Policy Development** through **Consistent** use of **Benchmarking**, **Standards** and **Key Performance Indicators**.

Facts about the **Value** of mental health and addiction services, supporting **Workforce Development** activities, **Cultural Relevance** and transforming mental health and addiction data into **Knowledge** to support our vision;

“IMPROVED HEALTH OUTCOMES FOR ALL TANGATA WHAIORA/HEALTH CONSUMERS”

1.4 Collection of data

PRIMHD data is used to report on what services are being provided, who is providing the services, and what outcomes are being achieved for health tangata whaiora/consumers across New Zealand's mental health and addiction sector. These reports enable better quality service planning and decision-making by mental health and addiction service providers, at the local, regional and national levels.

The data is stored in the PRIMHD datamart which is part of the Ministry's national data warehouse.

Data is collected from District Health Boards (DHBs) and the Non-Government Organisation (NGO) sector agencies that fit within the scope of PRIMHD³

2 PRIMHD RECORD CODE SETS

This chapter of the standard describes each of the code sets for each of the record types that are detailed in Chapter 2, PRIMHD RECORD TYPES, in HISO 10023.3:2017 PRIMHD Data Set Standard.

2.1 Healthcare User (HC) Record Code Sets

2.1.1 Healthcare User Record coded data elements

The following table lists the data elements and the applicable code sets to be used when creating a 'Healthcare User' record. This includes those data element code sets that have been previously detailed within this standard. Data element code sets that have been previously detailed have not been repeated. Instead there is a reference to the applicable chapter/section in this standard.

Data Element	Reference	Data Element	Reference
(a) Sex	2.1.1.1	(b) Ethnicity	2.1.1.2

2.1.1.1 Sex

A classification of the SEX of an individual, as supplied by the organisation. The coded data for the following code set is listed below for reference purposes only. The PRIMHD data is sourced from the National Health Index.

Code	Description	Note
F	Female	
I	Indeterminate	
M	Male	
U	Unknown	Not stated, or inadequately described.

³ Refer PRIMHD website for the scope of PRIMHD (<http://www.health.govt.nz/nz-health-statistics/national-collections-and-surveys/collections/primhd-mental-health-data>)

2.1.1.2 Ethnicity

A classification of the individuals ethnicity data is sourced directly from the National Health Index (NHI) – refer to the Ethnicity Data Protocols (Ministry of Health).

2.2 Legal Status (LS) Record Code Sets

2.2.1 Legal Status Record coded data elements

The following table lists the data elements and the applicable code sets to be used when creating a 'Legal Status' record. This includes those data element code sets that have been previously detailed within this standard. Data element code sets that have been previously detailed have not been repeated. Instead there is a reference to the applicable chapter/section in this standard.

Data Element	Reference	Data Element	Reference
(a) File Version	2.2.1.1	(b) Legal Status Code	2.2.1.2
(c) Sex	2.1.1.1		

2.2.1.1 File Version

A code indicating which version of the PRIMHD XML Schema that the data elements in the organisations extract file are compliant with.

Code	Description	Code Valid From	Code Valid To	Used for/Comment
1.0	Version 1.0	01-07-2008	30-06-2009	
2.0	Version 2.0	01-07-2009	30-06-2010	
2.1	Version 2.1	01-07-2010	30-06-2014	
2.2	Version 2.2	01-07-2014	30-06-2016	
2.3	Version 2.3	01-07-2016		

2.2.1.2 Legal Status Code

Code describing a tangata whaiora/consumer's legal status under the appropriate section of the Mental Health (Compulsory Assessment and Treatment) Act 1992, the Alcoholism and Drug Addiction Act 1966 (repealed 21 February 2018), the Intellectual Disability (Compulsory Care and Rehabilitation) Act 2003, the Criminal Procedure (Mentally Impaired Persons) Act 2003, and the Substance Addiction (Compulsory Assessment & Treatment) Act 2017.

The table below lists all the current Legal Status codes that were applicable as at the date this standard was published. For a full list of all Legal Status Codes, including those historical codes retired prior to this standard being published, please refer to the following website address.

2.5 Classification (CN) Record Code Sets

2.5.1 Classification Record coded data elements

The following table lists the data elements and the applicable code sets to be used when creating a 'Classification' record. This includes those data element code sets that have been previously detailed within this standard. Data element code sets that have been previously detailed have not been repeated. Instead there is a reference to the applicable chapter/section in this standard.

Data Element	Reference	Data Element	Reference
(a) Clinical Coding System ID	2.5.1.1	(c) Clinical Code Value	2.5.1.3
(b) Diagnosis Type	2.5.1.2		

2.5.1.1 Clinical Coding System ID

A code identifying the clinical coding system used for diagnoses and procedures. See table below:

Code	Description	Used for/Comment
01	ICD-9	
02	ICD-9-CM	
03	Read	
04	ICPC	
05	Continuum AMR codes	
06	ICD9-CMA	
07	DSM-IV	
08	SNOMED CT	For future introduction yet to be determined.
10	ICD-10-AM first edition	
11	ICD-10-AM second edition	
12	ICD-10-AM third edition	
13	ICD 10-AM sixth edition	For introduction from 1 July 2008.
14	ICD 10-AM eighth edition	For introduction from 1 July 2014.
15	ICD 10-AM eleventh edition	For introduction from 1 July 2019.

2.5.1.2 Diagnosis Type

A code that groups clinical codes or indicates the priority of a 'diagnosis'.

The table below lists only those diagnosis type codes that are used for mental health records. The full list of all diagnosis type codes (aka Event Clinical Code Type Code), including those historical codes retired prior to this standard being published, please refer to the following website address.

<http://www.health.govt.nz/nz-health-statistics/data-references/code-tables/common-code-tables/event-clinical-code-type-code-table>

Code	Description	Code Valid From	Code Valid To	Used for/Comment
A	Principal diagnosis	01-01-1900	30-06-2020	
B	Other relevant diagnosis	01-01-1900	30-06-2020	
P	Mental health provisional diagnosis	01-01-1900	30-06-2020	

2.5.1.3 Clinical Code Value

A code used to classify the condition or issue. Must be a valid code in one of the specified clinical coding systems. The only coding systems currently permitted to be used in PRIMHD are listed below.

- ICD-9-CM 2nd Edition – Australian version of the International Classification of Diseases, 9th Revision, Clinical Modification.
- ICD-10-AM 1st Edition – The International Statistical Classification of Diseases and Related Health Problems, 10th Revision, Australian Modification, 1st Edition.
- ICD-10-AM 2nd Edition – The International Statistical Classification of Diseases and Related Health Problems, 10th Revision, Australian Modification, 2nd Edition.
- ICD-10-AM 3rd Edition – The International Statistical Classification of Diseases and Related Health Problems, 10th Revision, Australian Modification, 3rd Edition.
- ICD 10-AM 6th Edition, The International Statistical Classification of Diseases and Related Health Problems, 10th Revision, Australian Modification, 6th Edition (from 2008).
- ICD 10-AM 8th Edition, The International Statistical Classification of Diseases and Related Health Problems, 10th Revision, Australian Modification, 8th Edition (from 2014).
- ICD 10-AM 11th Edition, The International Statistical Classification of Diseases and Related Health Problems, 10th Revision, Australian Modification, 11th Edition (from 2019).
- SNOMED CT (Systematized Nomenclature of Medicine – Clinical Terms), a comprehensive clinical terminology, owned, maintained, and distributed by the International Health Terminology Development Organisation (IHTSDO) (future availability/use to be advised).
- DSM-IV – Diagnostic and Statistical Manual of Mental Health Disorders, 4th Edition.

2.6 Collection Occasion (CO) Record Code Sets

2.6.1 Collection Occasion Tool Record coded data elements

The following table lists the data elements and the applicable code sets to be used when creating a 'Collection Occasion' record. This includes those data element code sets that have been previously detailed within this standard. Data element code sets that have been previously detailed have not been repeated. Instead there is a reference to the applicable chapter/section in this standard.

2.9 Team (TR) Record Code Sets

2.9.1 Team Record coded data elements

The following table lists the data elements and the applicable code sets to be used when creating a 'Team' record. This includes those data element code sets that have been previously detailed within this standard. Data element code sets that have been previously detailed have not been repeated. Instead there is a reference to the applicable chapter/section in this standard.

Data Element	Reference	Data Element	Reference
(a) Team Code	2.9.1.1	(e) Team Service Type	2.9.1.4
(b) File Version	2.2.1.1	(f) Team Target Population	2.9.1.5
(c) Team Type	2.9.1.2	(g) Agency Code and Name	2.9.1.6
(d) Team Setting	2.9.1.3	(h) Organisation Type	2.9.1.7

2.9.1.1 Team Code

A 'Team Code' (assigned by the Ministry of Health) uniquely identifies a mental health and addiction services team. This team can be defined as a person or functionally discrete grouping of people based in a particular location providing mental health and addiction care to a tangata whaiora/consumer group in either an inpatient or community setting. The 'Team Codes' change as mental health and addiction services teams are established and disestablished. The 'Team Code' is uniquely linked to 'Organisation Identifier' and/or 'Health Agency' code. Currently, this code table is managed by the Ministry of Health. An extract is published to the Ministry of Health web site at the web address, below:
